DI TECNOLOGIA

TITLE

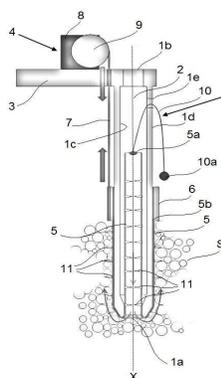

Device for autonomous and non-disruptive penetration of environments

INVENTORS

Ali Sadeghi, Liyana Popova, Alice Tonazzini, Barbara Mazzolai

DESCRIPTION

The invention relates to the sector of robotic devices for the autonomous and non-disruptive penetration and the movement inside structured and primarily non-structured environments like for example: the ground, rubbles or organic tissues. More particularly the invention relates to a device with a continuous three-dimensional track suitable for exploration, monitoring or diagnostic objectives.

APPLICATIONS

Water research, geological studies, monitoring, diagnosis

KEYWORDS

Robotic devices, bio-inspired, self-penetrating, three-dimensional track

BIBLIOGRAPHIC DATA

Dispositivo Per La Penetrazione Autonoma E Non Distruttiva Di Ambienti

Application Number

IT FI2013A000101

Priority Date

May 3, 2013

Applicants

Fondazione Istituto Italiano di Tecnologia
