TITLE

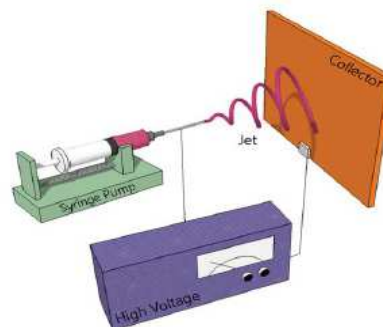

Adhesive composition comprising a cyanoacrylate compound with a silyl isocyanate treated silica gel

INVENTORS

Ilker S. Bayer, Elisa Mele, Roberto Cingolani, Athanasia Athanasiou

DESCRIPTION

The present invention relates to an instantaneous adhesive composition which is satisfactorily made thixotropic or gelled and has a rapid setting time and an excellent adhesive strength, said composition being obtained by adding to an α -cyanoacrylate a silica gel treated with a silyl isocyanate.

APPLICATIONS

Biomedical scaffolds, medical devices, coatings, textile industry, filter industry

KEYWORDS

Cyanoacrylate, super glue, electrospinning, cyanoacrylate polymerization, nanofibers

BIBLIOGRAPHIC DATA

Procedimento per la produzione di fibre di poli-cianoacrilato

Application Number IT TO2013A000396

Priority Date May 16, 2013

Applicants Fondazione Istituto Italiano di Tecnologia
