TITLE

Implantable Device For Localized Administration Of Drugs, Uses And Manufacturing Procedure

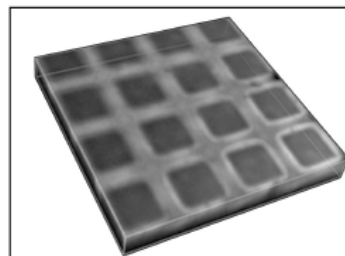

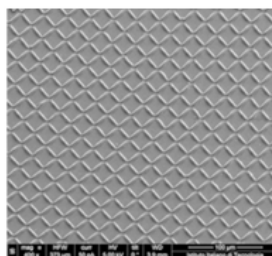

INVENTORS

Paolo DECUZZI, Daniele DI MASCOLO

DESCRIPTION

The present invention relates generally to an implantable device for the localized administration of drugs. More particularly, the invention relates to an implantable device for the localized administration of drugs that has been developed primarily for the treatment of tumors, even more specifically of brain tumors.

A

APPLICATIONS

Pharmacology, therapy

KEYWORDS

Drugs, tumors, implantable device, PDMS, PVA, Polymers, lipids, PEG

BIBLIOGRAPHIC DATA

Dispositivo Impiantabile Per La Somministrazione Localizzata Di Farmaci, Suoi Usi E Suo Procedimento Di Fabbricazione

Application Number IT 102018000004220

Priority Date April 5, 2018

Applicants Fondazione Istituto Italiano di Tecnologia
